STRAIGHT TALK & TIPS FOR SNOW'S CUSTOMERS

WHAT'S INSIDE:

- A Message from Our President
- Count on Our Home Comfort Services This Fall & Winter
- Thinking of Converting to Gas? Choose Propane!
- Snow's Commitment to Sustainability
- Providing Comfort at the Crosby Mansion

Dear Friends,

As the days grow shorter and the evening air takes on a crisp chill, we at Snow's Fuel Company are looking forward to embracing everything the fall season has to offer—from festive treats to colorful foliage, cozy sweaters, and football games. This time of year has something for everyone.

There's no better way to welcome a new season than with exciting news happening at our company right now. As a part of our ongoing commitment to provide customers with the best service possible, I'm delighted to formally introduce Nick Lombardozi as the new General Manager of Snow's Fuel. We are confident that Nick's leadership will further enhance our ability to meet your needs and exceed your expectations.

For six generations, connecting with our customers has been a pillar of our family business. I will continue to be available and deeply involved at Snow's, but I am elated to have Nick managing and working with customers. If you have any questions, please get in touch! Nick and I are eager to connect with you and ensure your experience with Snow's Fuel remains exceptional.

In this newsletter, you'll find an exciting giveaway, our various fall and winter services, the benefits of a propane conversion, and a closer look at our ongoing commitment to sustainability. We're also excited to share that we've completed a ductless mini-split installation at one of the area's most famous landmarks!

As always, thank you for your continued loyalty to and trust in Snow's Fuel! You can count on us for reliable fuel delivery, plumbing, HVAC, electrical service, and more. Reach out to us online or by phone at (508) 255-1090 to book service with our experts today.

Enjoy a festive fall season,

Harrison Snow

NEED EMERGENCY SERVICE?

Our team is here to keep your home safe and warm.
Call (508) 255-1090 for emergency service.

Emergency service is available for Snow's Fuel service plan customers only.

THINKING OF CONVERTING TO GAS? CHOOSE PROPANE!

Are you considering converting your home or business on Cape Cod to natural gas? We highly encourage you to weigh your options carefully before making such an important decision. Here are the top 4 potential problems with converting to natural gas:

PROBLEM #1

Natural gas service is a utility that does not come with any kind of service. You will have to find a local service provider to call for equipment conversion, installation, or repairs.

SOLUTION

Heating oil and propane users can order fuel delivery from Snow's Fuel.

PROBLEM #2

When you become a natural gas customer, you will have to convert more than just your heating system! You must also convert all your appliances or invest in new equipment.

SOLUTION

If your home or seasonal residence already has heating oil or propane heating equipment, you're good to go!

PROBLEM #3

In September of 2018, thousands of Merrimack County residents were evacuated from their homes due to natural gas explosions.

SOLUTION

Heating oil and propane are both extremely safe fuel options and we at Snow's follow all industry requirements to keep our customers safe.

PROBLEM #4

Natural gas utility service is a large-scale business that handles customer service from major call centers. You won't be dealing with a local customer service representative.

SOLUTION

Getting your heating oil or propane delivered by Snow's means doing business with people who live and work in your community.

SNOW'S COMMITMENT TO SUSTAINABILITY

At Snow's Fuel, we're proud of our dedication to helping the environment while also keeping our customers comfortable year-round. From installing the best in high-efficiency heating and cooling equipment to delivering sustainable Bioheat® fuel, we're invested in helping to shrink our collective carbon footprint.

FAST FACTS ABOUT PROPANE

#1 Propane is a low carbon fuel.

Propane meets the rigorous standards set by the Clean Air Act of 1990 and all clean air energy standards for burned fuels by the Environmental Protection Agency.

#2 Propane is created right here in the United States.

Domestically produced fuels such as propane require less energy and carbon output for shipping and storage, meaning that USA-produced propane gas is environmentally conscious.

#3 Propane provides more sustainable solutions for clean energy.

Propane's versatility in powering a wide array of home appliances—including your furnace, boiler, water heater, pool heater, indoor fireplace, outdoor range, kitchen stove, and generator—means that homeowners can do their part in lowering their household emissions.

#4 Did you know?

Using high-efficiency heating equipment can help reduce carbon emissions by up to 2.5 tons if you heat your home with oil*.

1Energy.gov

BIOHEAT® FUEL...

>> Contains Less Carbon

Bioheat® fuel is the only heating fuel that can lower its carbon content over time and is nontoxic, nonexplosive, biodegradable, and produces significantly fewer emissions than traditional fuel oil.

>> Supports Our Economy

Bioheat® fuel supports 72,000 jobs across the country, contributing to our national and local economy.

>> Is Available Now

Bioheat® fuel is made with renewable biodiesel blended with traditional heating oil and can be used in your existing oil heat equipment without modifications.

PROVIDING COMFORT TO THE CROSBY MANSION

Snow's Fuel was thrilled to receive the bid to install ductless mini-splits inside the historic Crosby Mansion in Brewster! It was an honor to work on this special project, and our team handled each aspect of it with care so that the installation was completed delicately within this important local landmark.
