## SNOW'S SPOTLIGHT: POWERING YOUR HOME WITH PROPANE

Propane is a safe, efficient, and versatile fuel source that offers dependable performance year-round. It's highly regulated for safety and trusted by homeowners on the Cape for everything from heating and hot water to cooking and backup power. Not to mention, propane systems are known for their long lifespan and lower emissions compared to other fuel types!

### Snow's Fuel Supports Your Propane Needs with Expert Propane Services:

- ✓ Deliveries
- ✓ Equipment Installations
- ✓ Repairs & Maintenance
- ✓ Pricing Plans
- ✓ Tank Monitoring
- ✓ And More!

**255-1090** to speak with one of our team members!

# SYMPTOMS OF AN **AGING** HEATING SYSTEM

As you prepare for the heating season, it's important to pay attention to what your current heating system is telling you. If your equipment is exhibiting any of these warning signs, it might be time to consider upgrading to a new, more efficient system before the cold really sets in.

## **Rising Energy Bills:**

A spike in your heating costs without any changes to your heating habits might mean your system is using more fuel or energy to do the same it used to do easily.

## **Strange Noises or Smells:**

Banging, clanking, or rattling may signal loose or worn parts in your system while musty or burning smells could mean electrical issues or debris buildup.

## **Uneven Heating:**

If some rooms are much warmer or cooler than others, your system might be struggling to distribute air evenly or is not the best sized system for your home.

## **Poor Indoor Air Quality:**

If the air in your home feels dry, there is an increase in dust, or you have increased allergy symptoms, your heating equipment might not be filtering or circulating air effectively.

## **Frequent Repair or Service Calls:**

Needing frequent service or repairs is often a sign that your system is beginning to fail, which can be just as costly as replacing the system entirely.

If your heating system is on its last leg, it's time to reach out to our experts. We are a full-service heating provider with the experience you need to help you choose the best equipment for your home. For a free, no-obligation quote, call Snow's fuel at (508) 255-1090 or visit our website to request an estimate: [snowsfuel.com/request-an-estimate/](https://snowsfuel.com/request-an-estimate/)

## EVERYTHING YOU NEED TO KNOW ABOUT **CONVERTING TO GAS**

If you're thinking about converting your heating system, there are several key factors to consider like:

- ✓ Accessibility to a Full-Service Energy Provider
- ✓ Appliance Capability
- ✓ Permitting & Inspection Requirements
- ✓ Differences in Utility Support
- ✓ Unexpected Conversion Costs

Snow's Fuel handles installation and service for both propane and natural gas equipment, offering expert guidance from start to finish. Our local, reliable support helps simplify the conversion process and can mitigate any concerns you might have.

Reach out to learn more about our gas services by giving us a call: (508) 255-1090.

# PROTECT YOUR HOME THIS WINTER WITH A GENERATOR INSTALL

Winter storms in our region can be unpredictable, and power outages are all too common. Having a backup power source in place means you can keep your heat running, appliances working, and your home safe, no matter what the weather brings.

## Installations:

Snow's Fuel proudly installs Generac® backup generators. Generac® is trusted by homeowners to supply dependable, automatic power during outages. Our experts can help you choose the right model, handle the hookups, and ensure your system is ready to go.

## Maintenance & Service Plans:

Like all major pieces of equipment, your generator needs regular care to work efficiently and safely. Snow's can provide you with both will-call maintenance appointments as well as dedicated service plans to keep your system running in peak condition.

Visit our website for more information on how Snow's can help keep you powered, no matter what:

## SNOW'S ENVIRONMENTAL INITIATIVES

At Snow's Fuel, we're dedicated to finding ways to reduce our environmental impact while helping our customers do the same.

### Bioheat® Fuel

A cleaner-burning alternative to traditional heating oil that helps lower greenhouse gas emissions and can be used in your existing heating oil equipment.

### Propane

An efficient, low-emission fuel that can be used in many areas of your home including heating, cooking, water heating, and much more.

### High-Efficiency Equipment

We install high-efficiency equipment that uses less fuel, can save our customers money, and reduce their carbon footprint.

### Paperless Billing

Cut down on waste with our convenient paperless billing option and view your statements and account history through our customer portal.
